Education

RMIT University — Melbourne, Vic
Master of Data Science — Jul 2024 - Jul 2026

Anna University — Chennai, India
Bachelor of Computer Science and Engineering — Aug 2020 - Apr 2024

Experience

Anoixe | Project Intern Data Analyst — Chennai, India | Aug 2023 - Mar 2024

- Collected, cleaned, validated, and transformed client data from multiple sources, improving its accuracy and readiness for analysis and reporting.
- Conducted exploratory and comparative analyses to identify trends, patterns, anomalies, and performance gaps relevant to client business requirements.
- Developed reports and interactive dashboards that translated complex analytical findings into clear insights for business decision-making.
- Worked directly on client deliverables, converting raw data into structured datasets, visual summaries, and actionable recommendations within project timelines.

Horticulture Club 1 | Insights Analyst — Chennai, India | Mar 2023 - May 2023

- Developed SQL queries and analytical workflows to clean, transform, and analyse business data, supporting accurate reporting and data-driven decision-making.
- Built interactive Tableau dashboards to visualise sales trends, customer behaviour, and key performance indicators, enabling stakeholders to identify business opportunities more effectively.
- Performed data preprocessing and exploratory analysis using Python (Pandas, NumPy, and Matplotlib), improving data quality and generating actionable insights for business reporting.

Skills

Programming Languages:	Python, SQL
Libraries/Frameworks:	Pandas, NumPy, Matplotlib, Scikit-learn, PySpark, FastAPI, Flask
Tools / Platforms:	Tableau, MS Excel, VS Code, Github, AWS, Streamlit
Databases:	MySQL

Projects / Open-Source

Australian Higher Education Dashboard | Link *Python | Streamlit | OCR | LLM | Pandas | Data Extraction*

- Developed a multi-format document extraction pipeline supporting PDF, scanned PDF, images, CSV, Excel, HTML, and TXT files with automatic file type detection and processing.
- Implemented OCR and LLM-based document processing to extract structured information from complex documents, improving accuracy across both scanned and digital files.
- Built an interactive Streamlit interface enabling users to upload documents, preview extracted data, and export structured outputs for downstream analytics workflows.
- Collaborated within a GitHub-based development workflow to integrate document extraction components into a unified higher education analytics platform.

Valui Cortex AI Platform | Link *Python | FastAPI | FAISS | RAG | AWS | REST APIs*

- Developed AI-powered retrieval services using Retrieval-Augmented Generation (RAG) with FAISS vector search to improve document retrieval accuracy.
- Implemented RESTful API endpoints using FastAPI to support secure retrieval workflows and backend integration.
- Designed metadata-based filtering to deliver context-aware search results for different user groups and access levels.

- Collaborated within an Agile team using GitHub to integrate AI services into a scalable enterprise application.

Global Sales Performance Dashboard | Link *Tableau | SQL | Excel*

- Developed an interactive Tableau dashboard to analyse global sales performance, revenue trends, regional performance, and product category KPIs.
- Applied calculated fields, interactive filters, drill-down analysis, and geographic mapping to enhance business reporting.
- Produced executive-level visualisations that supported data-driven decision-making through clear KPI tracking and performance analysis.

Fashion Recommendation System | Link *Python | Flask | SQL | Scikit-learn | TF-IDF*

- Built an end-to-end machine learning web application using Flask to predict customer product recommendations from review text and ratings.
- Applied TF-IDF feature engineering and Logistic Regression to classify recommendation likelihood using customer review data.
- Integrated SQL, Python, and a responsive web interface to provide real-time recommendations and an intuitive user experience.

Certifications

- The Full Stack - **Meta**
- Data, data everywhere - **Google**
- Data Analytics and Visualization Job Simulation - **Accenture**
- Crash course on Python - **Google**
- Developer Virtual Experience Program - **Accenture**
- AWS Academy Graduate - **AWS academy**
